**Hello Kim,**

**As a followup to our recent conversation regarding the MMIP for the Thomas Prince School, I reviewed my files and have determined that an MMIP has not yet been submitted. I had been working on it and halted the work once the town determined their desire to submit a modification to the original plan.**

**Therefore, in agreement with our recent discussion, I recommend that post-abatement sampling of the indoor air and porous surfaces (epoxy coated and non-coated) be performed soon after the abatement activities are completed and that an MMIP subsequently be submitted and implemented to address all of the abated areas.**

**Following tomorrows meeting at the Thomas Prince School, I will get back to you regarding the recommendations for the exterior air intake vents (both 100 and 200 wings).**

**Thank you for your prompt attention to this matter.**

--

**Best Regards,**

**Chuck**
